Applications

The 2 Channels Wireless Fixture Controllers allow for two channels of 0-10 dimming, active high relay control, and has a general purpose I/O. These controllers are controlled wirelessly via Bluetooth Mesh technology allowing for wireless dimming of LED lighting. The compact size allows for seamless integration to the fixture.

Alternate input voltages are available for voltages rated 18-48V.

Wireless Control Operation

Proprietary Casambi Bluetooth Mesh: The unit can pair with an Android or iOS application to allow initial setup and subsequent adjustments. End users can program dimming levels and group multiple

2 Channel Dimming: allows for two 0-10 dimming channels for driver control. These controllers allow for color temperature mixing of the two color white

Relay Control: High control output can be used to trigger relays or other control circuitry.

See mwConnect Casambi Commissioning User Manual for more info.

Accessories

Power Pack: The PSC-WCM-100/200(-EC)-BLE-CB operate on 12-24VDC/18-48VDC input and require a separate power pack such as the PacWave™ PSC-AC-PP-200/400/700C/800/900.

Alternatively, the unit can also operate with a driver that has an auxiliary output (12V) or high voltage 18-48 VDC.
